

## MOTOR CAR GOSSIP

### NO MIDSUMMER DULLNESS IN SALE OF VON HAMM-YOUNG CO.

The sales department of the von Hamm-Young Co., Ltd. has been exceptionally active this week and reports the delivery of nine cars, which is quite a record for this season of the year.

The Buicks head the list, with three out of nine sales while the other sales are evenly divided amongst the Hupmobile, Cadillac, Everitt and Thomas.

The prize sale of the week was a Cadillac touring car sold to one of Honolulu's most prominent society

matrons, Princess Abigail Kawana-nakoa. The Princess selected the Cadillac owing to its ease of riding and its wonderful up-to-date improvements, and she is already very much impressed with the superiority of the Cadillac over all other cars in this class. She has already been seen on the streets driving her own car and has shown wonderful skill in mastering the car so soon after the purchase.

A new Cadillac runabout was shipped to the big branch of the von

Hamm-Young Co., at Hilo, to be delivered to Mr. John Scott of Wainaku. Mr. Scott is very enthusiastic over Cadillacs, as this is the second Cadillac runabout which he has owned. This second sale was no doubt brought about by the wonderful performance of his previous car. Mr. Scott used his first Cadillac runabout a great deal in his work about the plantation, and for the first year his entire expense for repairs or replacements was about \$3.50, which represented the purchase of a new set of dry cells. For a car which is used as a commercial vehicle, such as this car has been, this is certainly a record-breaking performance, and is only one of the great many achievements which the Cadillacs have recorded.

**Thomas Car Going to Japan.**

Mr. F. G. E. Walker purchased a Thomas tourabout and a Buick tour-

ing car which he is taking with him to Japan.

An Everitt Six touring car was sold this week on Kauai to Mr. Y. Shimizu, of Waimea, to be operated in the rent service.

Mr. M. Hagi purchased a Cadillac touring car which is also to be operated in the rent service on Kauai.

Mr. W. J. West, who is at present travelling on Kauai for the von Hamm-Young Co. reports the sale of a 4-passenger Buick touring car to Mr. A. Murata, of Waimea.

The Buick trucks are still showing their great superiority over all other light trucks which have been placed in light service as yet, and are fast becoming very popular in the Hawaiian Islands, but an absolute necessity to all firms who require quick light delivery service. This is clearly illustrated by the fact that Lorrin K. Smith, one of Honolulu's most promising young men, has recently purchased a Buick truck to be used in the express business which he has recently purchased. Mr. Smith purchased the business, good will and outfit of the Hawaiian Express Company and finds on taking over this business that it is absolutely necessary for him to have an automobile truck. The necessity for this truck is not only to insure prompt delivery but to cut expenses down. Horse and mule drawn vehicles in the Hawaiian Islands are so expensive to keep and operate that owners are fast realizing that trucks are operated on a much less expensive scale, and give 100 per cent better satisfaction and efficiency. There are more Buick trucks being used in the Hawaiian Islands than all other light trucks put together, which certainly shows that this type of truck is far superior to any make.

These trucks, although only allowing a carrying capacity of one ton, are built much heavier and stronger than many other trucks of larger capacity, although they still retain their flexibility and are not as hard on tires, gasoline and oil as many trucks with a smaller carrying capacity. Not only is the Buick truck an excellent car for service, but it is one of the handsomest wagons ever turned out.

When a Buick truck is seen hauling a load around the streets of Honolulu it attracts a great deal of attention and demonstrates to the public that the owners are not only progressive, but strictly up to date in their business.

The automobile business at large throughout the country is not feeling the expected depression which the presidential uncertainties at this time of the year usually cause. One can realize this when they find that the Packard Motor Car Co. in the two weeks ending July 31 shipped 255 cars, whose total value was \$1,275,000. The cars were leaving the factory at the rate of twenty a day. Fifty-six trucks were sent out in the same time, their value being \$196,000.

Because of this urgent demand for vehicles, officers of the Packard Motor Car Co. are convinced that the general situation is sound and are providing for an increased output in the early fall.

**Road Improved.**

It is very pleasing to the motorists to see that Ala Moana beach road is being ploughed up and rolled down to a flat surface. This is one of the prettiest drives in Honolulu and will be greatly appreciated by everyone who visits Waikiki. The public has long felt that the most important road in Honolulu is a road which leads from town to Waikiki. Nearly every tourist who visits the Islands goes to Waikiki beach, and oftentimes nowhere else, and as the first impression is most always a lasting impression, the Islands have always had the reputation of having very poor roads. This reputation has greatly hurt the tourist trade in the Islands, as is demonstrated by the fact that during the past few years very few tourists have brought their own automobiles to the Islands on account of the very poor roads in Honolulu.

The Board of Supervisors, and especially Mr. Murray, certainly deserves a great deal of thanks for starting work on the road to Waikiki, and if the good work is continued and a circuit made back over Kalakaua avenue, a great many people will be made happy.

### NEW POPE-HARTFORD WILL BE WHIRLWIND

The von Hamm-Young Co. this week received the specifications of the new model Pope-Hartford, which will be a whirlwind, and bids fair to be as popular a car as any machine on the market this year. This model will be known as the Model 31, the horsepower will be rated at 40, and it will have a wheel base of 118 inches. It is a high grade car of convenient size and comfortable proportions. It is fast and powerful, well tried and proved in every way worthy of the tremendous interest already manifested in it by those who from long experience know the value of the Pope-Hartford production.

When one realizes that this car will have the same quality and workmanship that the Pope has always had they will be surprised to learn that this car is to be listed at the factory at \$2250, which includes an electric starter, electric lights, top and glass front.

This model is offered in response to the universal demand for a car of medium power, weight and price embodying in every detail high grade principles and quality.

C. N. Laurier, son of the former premier of Canada, was robbed in San Francisco of \$100 by a man who made his acquaintance on a street car and has disappeared.

### TO CURE A COLD IN ONE DAY

Take Laxative Bromo Quinine Tablets. • All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box.

PARIS MEDICINE CO., St. Louis, U. S. A.

## EFFICIENCY of

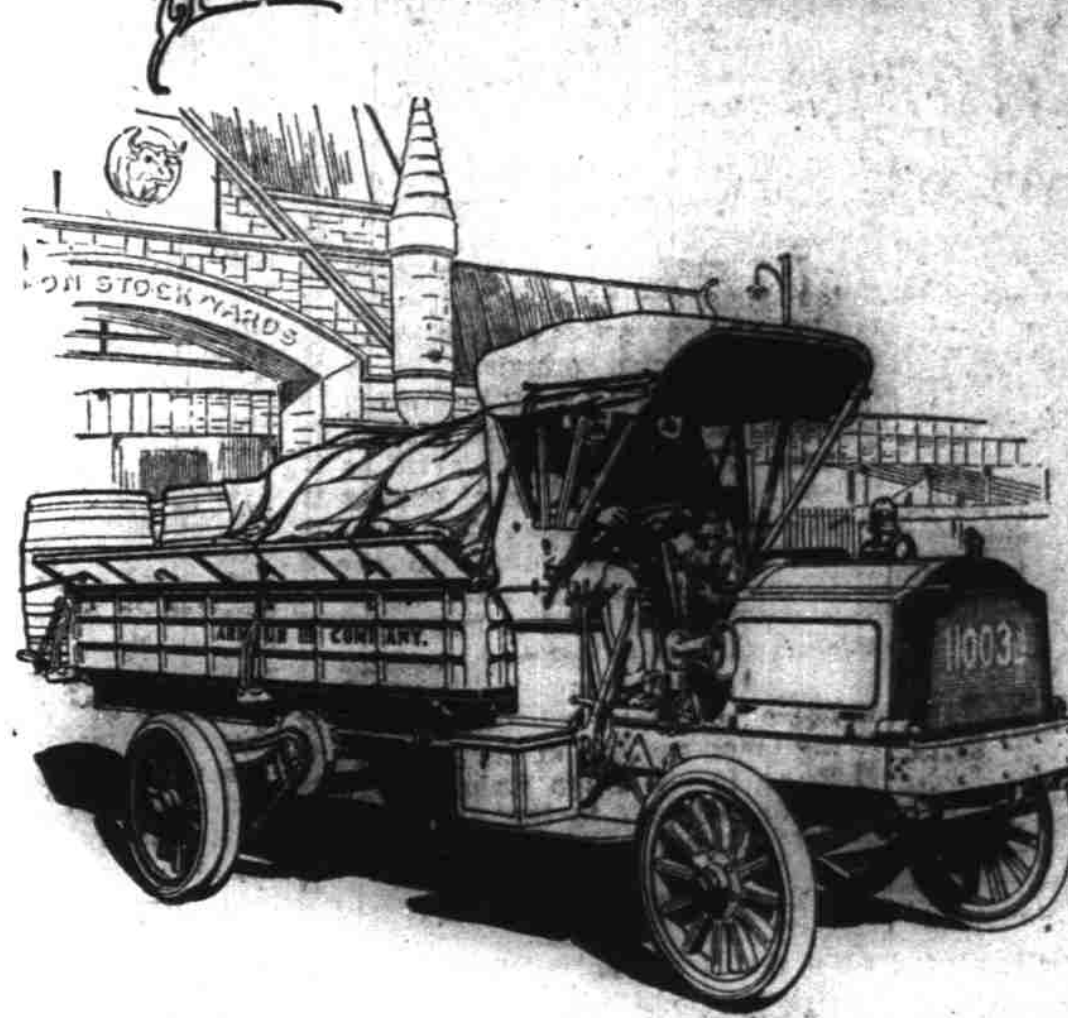

MOTOR TRUCKS

**T**HE Kreuger Brewing Company of Newark, N. J., uses six Packard trucks. They run ten hours a day and each truck averages fifty miles, carrying a full load. Seventy-five miles in a day is not uncommon. The six trucks replace fifteen two-horse teams and effect a substantial saving in delivery cost.

Packard trucks are most efficient in long hauls—3 tons, 12 miles an hour. Ask for catalog and arrange for a demonstration.
